SUMMARY

Enthusiastic third-year Mechatronics Engineering undergraduate with a strong foundation in technical skills and innovative problem-solving. Experienced in teamwork and adaptability through leadership roles, academic projects at Curtin University, and industry exposure during previous work experience. Possess basic proficiency in SolidWorks, AutoCAD, and Python, with a strong commitment to applying and expanding knowledge in practical settings to advance technology and solutions.

EDUCATION

Curtin Colombo (Sri Lanka Branch of Curtin University Australia) Jul 2023 - Jun 2027

Bachelor of Engineering (Hons) in Mechatronics Engineering

- Third Year Undergraduate (Reading)
- 79.59% Course Weighted Average

Thurstan College - Colombo Jan 2009 - Jan 2022

- Completed G.C.E. Advanced Level with passes in Combined Mathematics (B), Physics (C), and Chemistry (C).
- Attained outstanding results at G.C.E. Ordinary Level, securing distinctions in Mathematics, Science, Buddhism, History, English Language, Sinhala Language, Commerce, English Literature, and Information Technology.

PROJECTS

University projects

Microcontroller Project

- Designed a dual-mode robotic car with autonomous maze navigation using ESP32-CAM and manual Bluetooth control via HC-05, demonstrating embedded programming skills in C and real-time robotic control systems.

Autonomous Vehicle Management System(AVMS)

- The Autonomous Vehicle Management System was developed as part of a university assignment, utilising various data structures and algorithms in Python.

Practical solution for a pressing issue

- During our first year at university, we designed a road structure as a solution for the muddy roads of Saibai Island, as requested by Australian engineers. We created tender reports for our model and evaluated contractor and designer reports from other teams.

Projects during internship

Air Quality Monitoring (AQM) Devices

- Developed C++ software for e-paper displays and carried out regular maintenance of AQM devices to ensure accurate and reliable performance.

QR Code Scanning Devices for Transactions

- Implemented BLE-based self-payment systems, enabling secure and efficient QR code scanning for seamless transaction processing.

WORK EXPERIENCE

C3 Labs - Research and Development

Nov 2024 - Feb 2025

- During my internship, I contributed to multiple projects by taking responsibility for urgent deliverables and consistently meeting tight deadlines. I frequently worked overtime to ensure timely completion, while collaborating effectively with team members and senior employees to achieve project goals. This experience strengthened my ability to deliver high-quality results under pressure in a team-oriented environment.

ADDITIONAL QUALIFICATIONS

PLC Programming Certification - SLIR Institute

- Completed industry-focused PLC programming training covering automation systems, HMI/SCADA development, motor controls, and hands-on experience with Siemens, Mitsubishi, and Xinje PLC platforms.

KEY ACHIEVEMENTS

President - Photographic Society of Thurstan College

2020 - 2021

- I collaborated with my colleagues to organize events and manage junior members of the society.

Assistant Treasurer - Curtin Colombo Student Guild

2024 - 2025

SKILLS

- SolidWorks
 - AutoCad
 - Matlab
 - Python
- Teamwork
 - Adaptability
 - Leadership
 - Time Management

INTERESTS / PASSION

- Robotics and Automation
- Product Design and Development

ADDITIONAL INFORMATION

- Languages: English, Sinhala
- Sports: Basketball
- Additional skills: Photoshop
